

ANGULAR

ONLINE WORKSHOPS

12 Online Meetings

26/10/21 Introduction meeting

09/11/21 Workshops / weekly working meeting start

Presenters: Senior Developers from Avanade

Participants: Students with basic web development knowledge

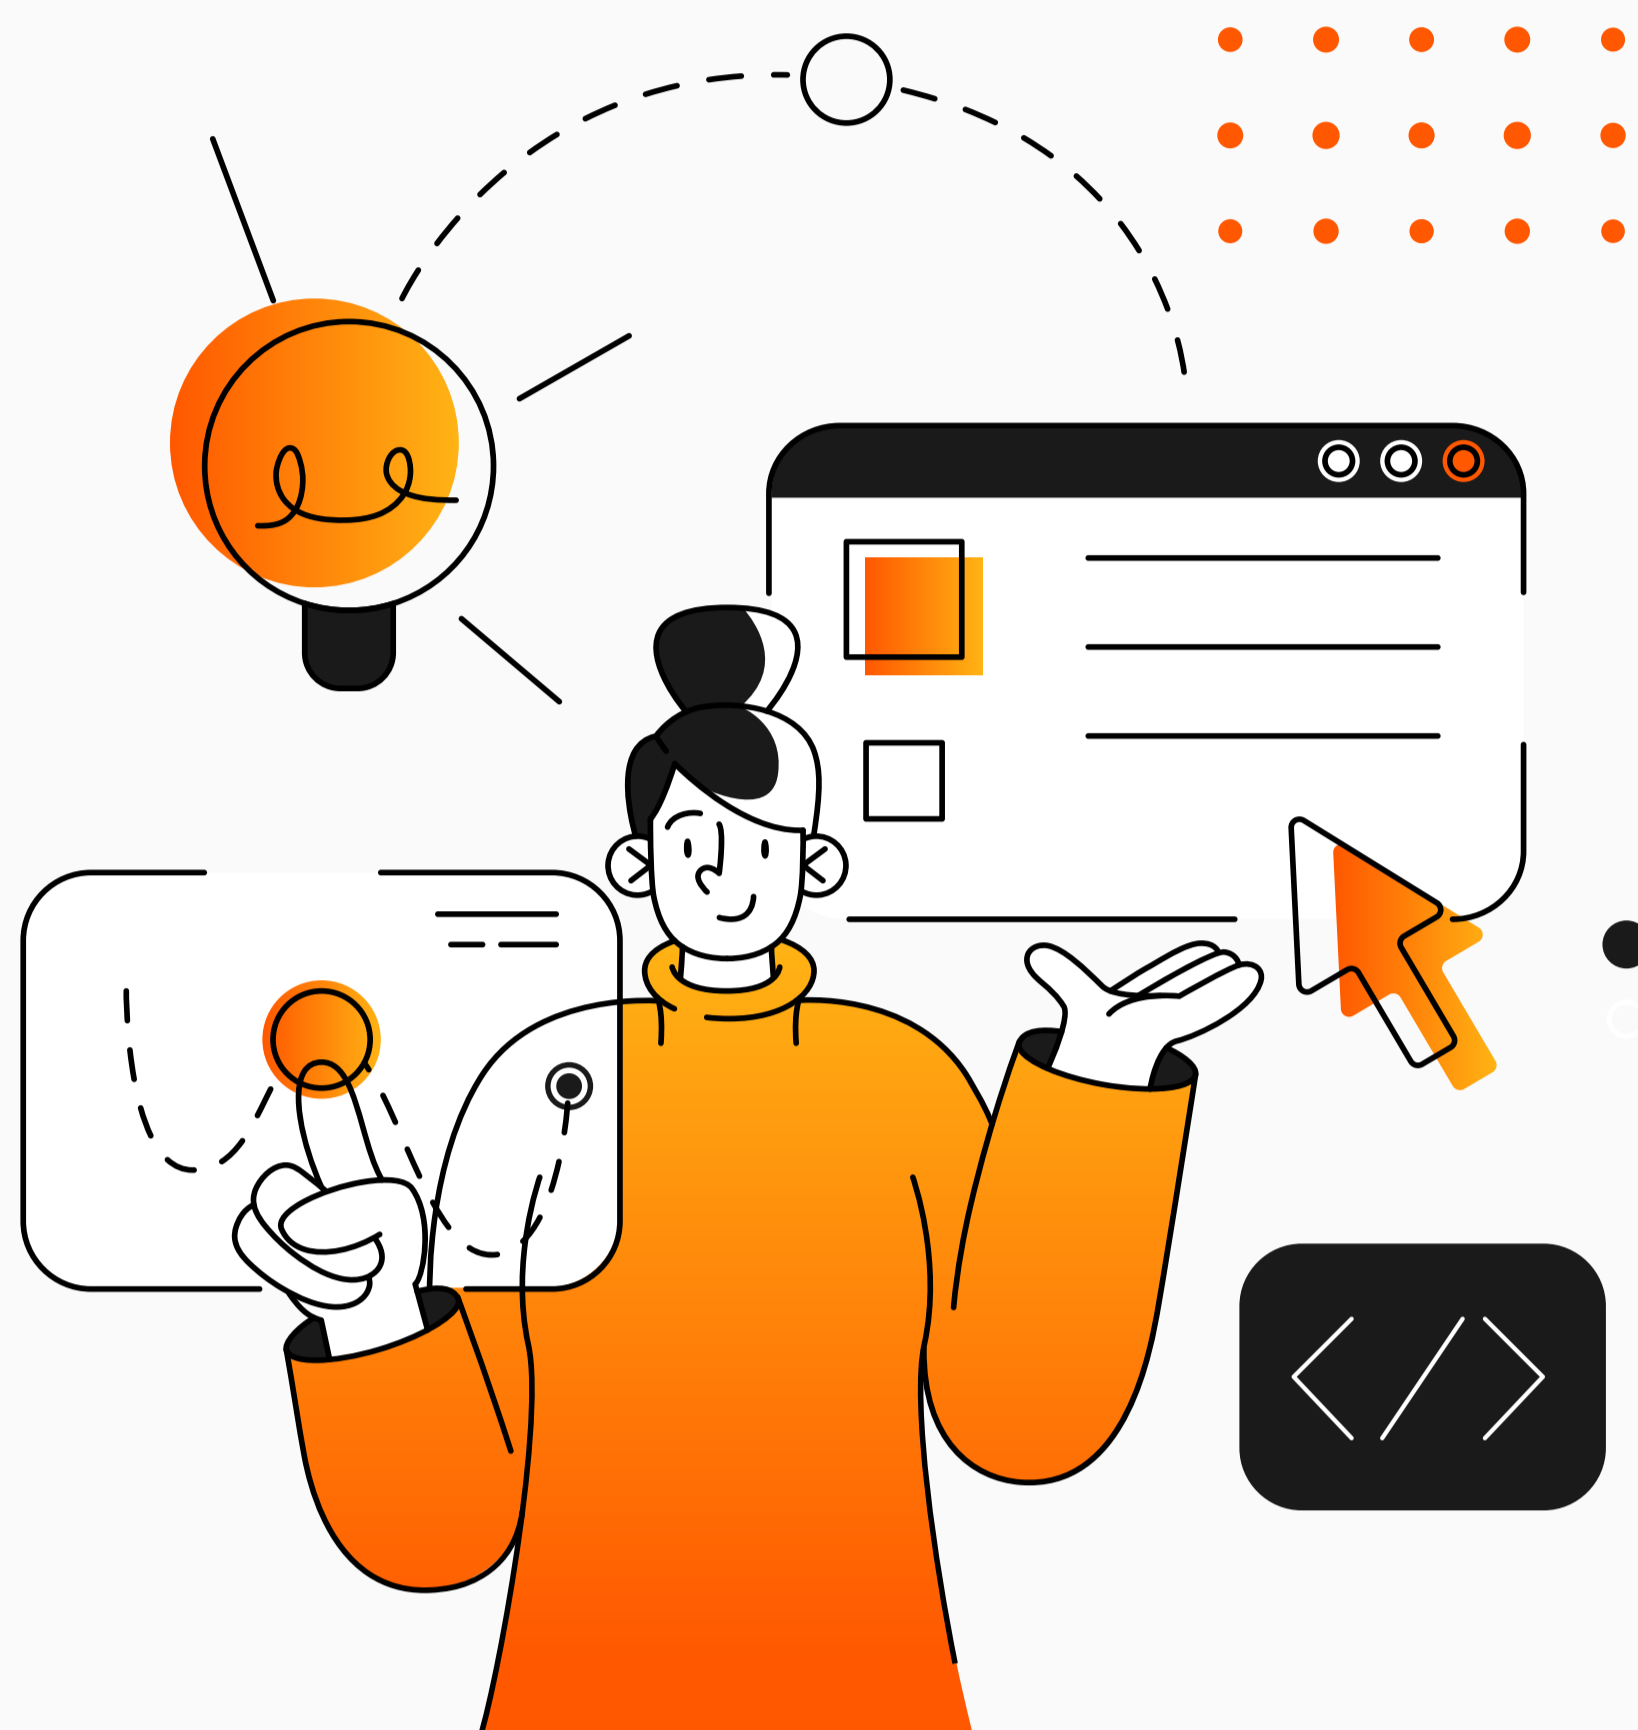

html: document structure, commonly used tags, attributes

css: any styling knowledge would be a plus

js: variable types, loops, functions, language built in functions

general web knowledge: url, http, object oriented programming
experience with any IDE (we recommend Visual Studio Code)

Any knowledge related to node or TypeScript, would be a plus but it is not necessary.

Who We Are

At Avanade, our vision is to be a leading digital innovator, creating great experiences as we realize results for our clients and their customers through the power of people and Microsoft ecosystem.

What We Offer

Meetings are dedicated for future frontend or full-stack developers. It is for you if you plan to build reusable components to create exciting, beautiful user interfaces for web applications. It is NOT for you if you don't want to touch user interfaces at all and you are backend focused. After the course you will be able to work as and pass interview for a junior angular developer role. You will be aware of some best practices used in Angular projects. You will be able to create a new app from scratch, configure and deploy it to server. You will be aware where to seek for knowledge and will be aware of tools and tricks used for small and large projects. Your work with HTML will be no longer painful.
